

Project Initialization and Planning Phase

Date	27 June 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The Credit Card Approval Prediction System uses machine learning to evaluate applicant information and predict whether a credit card application is likely to be approved or rejected. The system aims to reduce manual effort, improve decision consistency, minimize processing time, and assist banks in making accurate approval decisions while giving applicants faster responses.

I am (Customer) An individual applying for a credit card.	I'm trying to (Get my credit card application approved quickly.)	But (The approval process depends on several financial and personal eligibility factors.)	Because (Banks verify income, credit history, and eligibility.)	Which makes me feel (frustrated and anxious)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An individual applying for a credit card.	Get my credit card application approved quickly.	The approval depends on several financial and personal eligibility factors.	Banks must verify income, credit score, repayment history, existing loans and other risk factors before making a decision.	Uncertain and anxious about the final approval result.
