Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements

This document defines the functional and non-functional requirements for the Credit Card Approval Prediction System.

Step 1: Functional Requirements (FR)

S.NO	Requirement Category	Requirement Category	Priority
1	Authentication	Secure login for admin/bank staff.	High
2	Authorization	Role-based access control	High
3	External Interfaces	Flask web app, ML model, CSV	High
4	Transaction Processing	Validate applicant data and predict approval.	High
5	Reporting	Prediction dashboard and reports.	Medium
6	Business Rules	Decision based on income, credit score and history.	High
7	Compliance	Comply with banking privacy standards.	High
8	Other	Maintain prediction logs.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric/ Acceptance Criteria
1	Performance & Speed	Fast prediction.	<5seconds
2	Scalability & Security	Support high applicant volume.	1000+ records AES-
3	& Privacy	Encrypt sensitive data.	Data encryption &
4	Reliability & Availability	High availability.	secure access
5	Usability & Accessibility	Responsive and easy UI	User friendly
6	Other	Maintainability and portability.	Modular design
