

Scalability & Future Plan

Date	5 July, 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address(High / Medium / Low)
1	Single-server deployment with Flask	Limited scalability for multiple users.	High
2	No database integration	Applicant records and prediction history are not stored.	Medium
3	Performance may decrease with increased user traffic	Slower response times under heavy load.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Single-user Flask application	Deploy with multiple instances and load balancing to support more users.
2	Data Storage	No database; uses dataset and model files	Integrate a database (e.g., MySQL or PostgreSQL) to store applicant records and prediction history.
3	Performance	Suitable for small-scale usage	Optimize the application and deploy on scalable cloud infrastructure for faster response times.
4	Security	Basic input validation	Add user authentication, HTTPS, and secure data storage to protect applicant information.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target timeline	Expected Impact
Phase-2	Database Integration	3–6Months	Better data management
Phase-3	User Authentication	6–9 Months	Improved security
Phase-4	Cloud & API Integration	9-12 Months	Better scalability and real-time processing
