

Project Executable Files

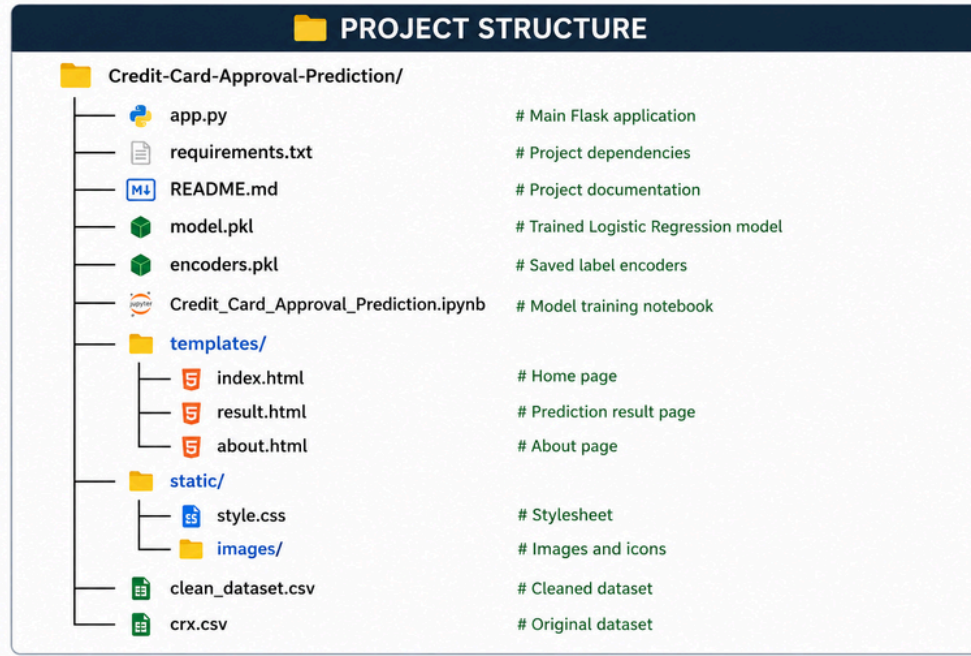

Date	4 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Project Executable Files

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://credit-card-approval-prediction-1-n63c.onrender.com/
Login Credentials (Demo)	No
Platform / Hosting Provider	Render
Repository Link	https://github.com/Archana0212/Credit-Card-Approval-Prediction
Demo Video Link	

Step 4: Run Instructions

1 Clone the Repository

Open terminal or command prompt and run:

```
> git clone https://github.com/Archana0212/Credit-Card-Approval-Prediction.git
```

✓ Repository cloned successfully.

2 Navigate to Project Folder

Run the following command:

```
> cd Credit-Card-Approval-Prediction
```

✓ You are now in the project directory.

3 Install Dependencies

Run the following command to install required Python packages:

```
> pip install -r requirements.txt
```

✓ All dependencies installed successfully.

4 Run the Application

Start the Flask server by running:

```
> python app.py
```

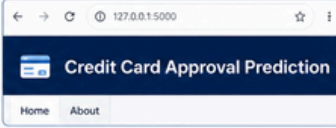

```
* Serving Flask app 'app'
* Debug mode: off
WARNING: This is a development server.
Do not use it in a production deployment.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
```

✓ Server started successfully.

5 Open in Browser

Open your web browser and go to:

<http://127.0.0.1:5000/>

✓ The application home page will open.

6 Use the Application

- ✓ Fill in all the required details in the form.
- ✓ Click on the Predict button.
- ✓ View the prediction result.
- ✓ Check the confidence score and explanation.

Prediction Result

Status: Approved

Confidence: 92.35%

Explanation:
The applicant has a good credit score, stable income, and meeting other essential criteria.

Recommendation:
The application is likely to be approved.

7 Stop the Server

To stop the Flask server, go to the terminal and press:

```
CTRL + C
```

The server will stop running.

```
* Serving Flask app 'app'
* Debug mode: off
WARNING: This is a development server.
Do not use it in a production deployment.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
^C
```

✓ Application stopped successfully.

Note

Make sure you have Python 3.9 or above installed on your system.

All the required libraries are listed in requirements.txt.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality and size of the training dataset.	Use a larger dataset.
2	Supports prediction only.	Final approval depends on the bank.
3	No database support.	Can be added in future.
